I am an aspiring Laravel / Full-Stack Developer with a strong focus on modern software development and emerging technologies. My experience involves active participation in building responsive web applications, RESTful APIs, and end-to-end full-stack solutions using PHP, Laravel, Node.js, HTML/CSS, and database management with MySQL and MongoDB. I am committed to continuously developing my technical skills through collaborative projects and real-world applications, while contributing to innovative software solutions that solve practical problems.

Educational Background

- B.Sc. in Computer Science** (Graduated with honour)
United International University, (Dhaka, Bangladesh | October 2020 – January 2026)
- Diploma in Computer Technology**
Empac College of Technology, (Chattogram, Bangladesh | August 2016 – February 2019)

Project

- Organic** - Foods at your Doorsteps (An Online Groceries Store - Ecommerce platform) using PHP Laravel, bootstrap CSS, Node.js, and MySQL.
- Synnex - ECom** (An online shopping Mall - Ecommerce platform) using PHP Laravel, Tailwind CSS, Node.js (Express), and MongoDB.
- Restaurant Management System** (a full-stack web application) using html, CSS, PHP Laravel and SSL payment, PostgreSQL
- Medical Management System** (Website) using html, CSS, PHP and JavaScript.
- CMS** – College Management System (Developed as jar, Java Project) using Java Swing, JDBC and MySQL, packaged as a JAR file.

Research Project

- Lightweight colon Polyp Segmentation Algorithm based on improved deeplabV3+** (waiting for acceptance)
Designed an optimized DeepLabV3++ based model for accurate colon polyp segmentation, reducing computational complexity while maintaining high segmentation performance. Enhanced feature extraction and boundary precision for efficient medical image analysis.
- Adversarial Pattern Mining in Network Traffic Using Contrastive Learning for Zero-Day Attack Detection** (currently working on it)
Implemented a contrastive representation learning approach to identify adversarial patterns in network traffic, improving generalization and resilience for zero-day attack detection.

Work Experience

- Java Instructor** (Internship) (R-Creation, Chattogram, Bangladesh) [February – July, 2019]
- Frontend Developer** (Internship) (DeshIt, Chattogram, Bangladesh) [October – December, 2018]
